SlingBag
for LifePod

Introduction

Let's Go See the World. Vaultek® SlingBag is the perfect companion for LifePod. With water resistant fabric and zippers, an ambidextrous over the shoulder strap, multiple layers of pockets, RFID pocket shields, and even an included lock and cable to keep your LifePod and SlingBag with you, right where they belong.

Table of Contents

What's Included

Vaultek® SlingBag / Combination Lock and Cable / LifePod Cable Adapter

SlingBag Features

Made for LifePod
Unique travel size is made to carry LifePod.

Water Resistant Construction
Fabric and zippers assist in repelling water to protect your belongings.

Anti-Pocket Picking Zippers
Clip zippers into their own D-rings during travel to make it difficult for anyone to try and discreetly open pockets.
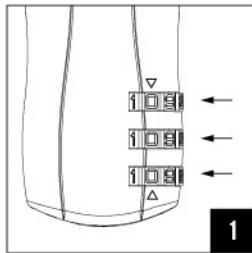

RFID Pocket Protection
Built in pocket shielding blocks credit cards and debit cards from unwarranted scanning.
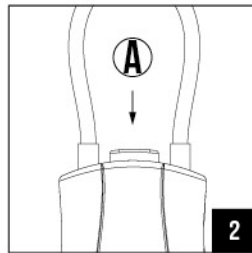

Locking Cable Access Port
Built in cable port allows you to route the cable lock outside the bag for additional security.
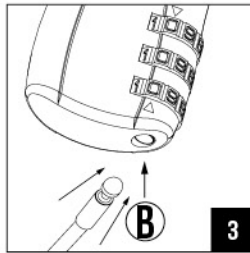

Setting Your Lock Combination

There is a 3 digit rolling lock to easily secure your SlingBag to a fixed object.
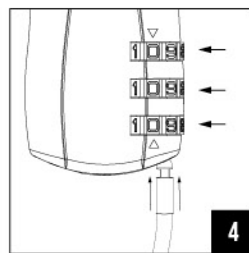

**1** Set dials to factory preset combination: 0-0-0

2 Push down the button(A) on the top of the lock and the cable tip will pop open.
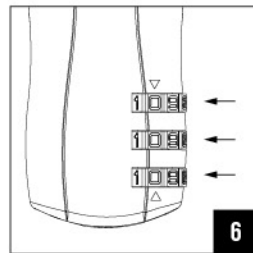

3 Push the button(B) under the lock. Hold button(B) in until you have completed setting your personal combination in step 4.

4 Turn the dials to your desired personal combination. Write down your selected personal combination for future reference.

5 Release the button(B). Hold cable tip and insert the cable tip into the hole until it snaps into closed position.

6 Rotate dials to lock.

Locking Your SlingBag

Using the cable lock and LifePod cable adapter, you can easily lock up your LifePod and SlingBag together and attach to a fixed object of your choice for security. Be sure and change the default lock combination before using the combination lock.
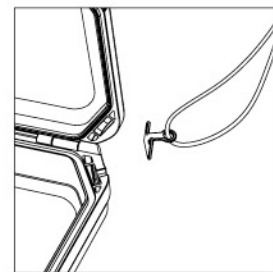

1 Open your LifePod, and slide the cable adapter into the receiving slot (reference page 04).

2 Close your LifePod and insert LifePod into SlingBag.

3 Open the cable lock, and feed the loose cable end though SlingBag's cable port (reference page 04). Wrap around a fixed object of your choice, and feed back through the cable port.

4 Insert loose cable end into the combination lock to secure, and stow combination lock in SlingBag's rear pocket.

5 Be sure to rotate the numeric dials to a different combination after locking to prevent anyone from easily unlocking the cable.
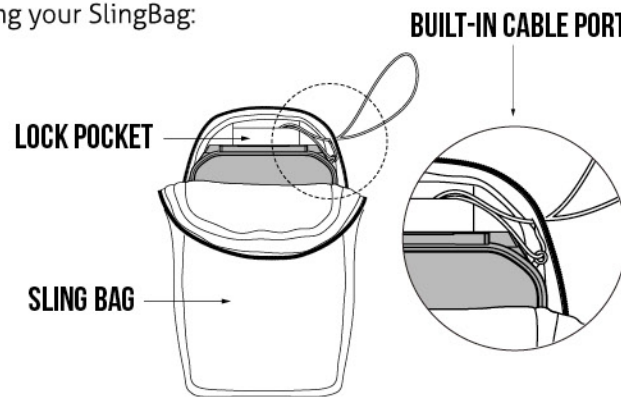

Unlocking Your Lock

To open your lock/turn the dials to your combination, and push the top button down. The cable hasp will pop open.
